

Come disegnare? A mano, o con calcolo grafico.

Posizionate a mano.  
3 sfere tangenti (tra loro).  
 $R = 3 \ 5 \ 7$ .

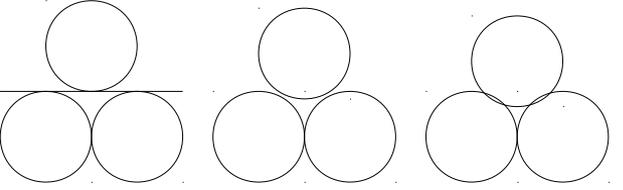

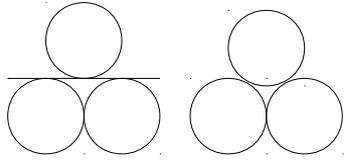

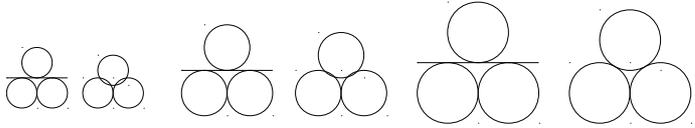

Altre circonferenze da  
costruire

$$R = 3 \ 4 \ 6$$

$$R = 3 \ 5 \ 6$$

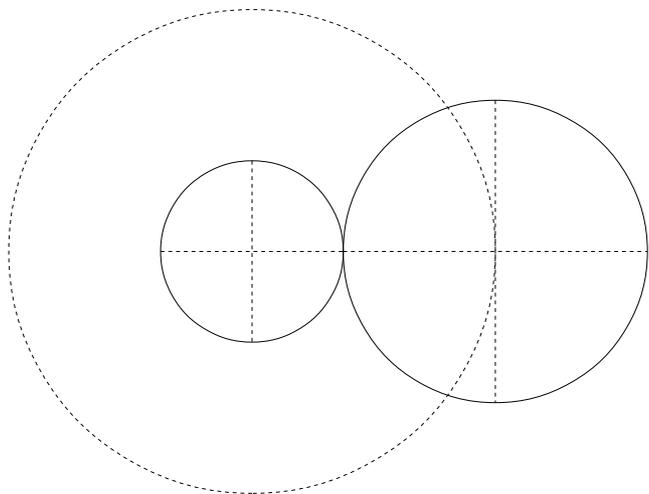

$$R = 2 \ 3 \ 4$$

Fare un foglio di calcolo  
che lo faccia in automatico.

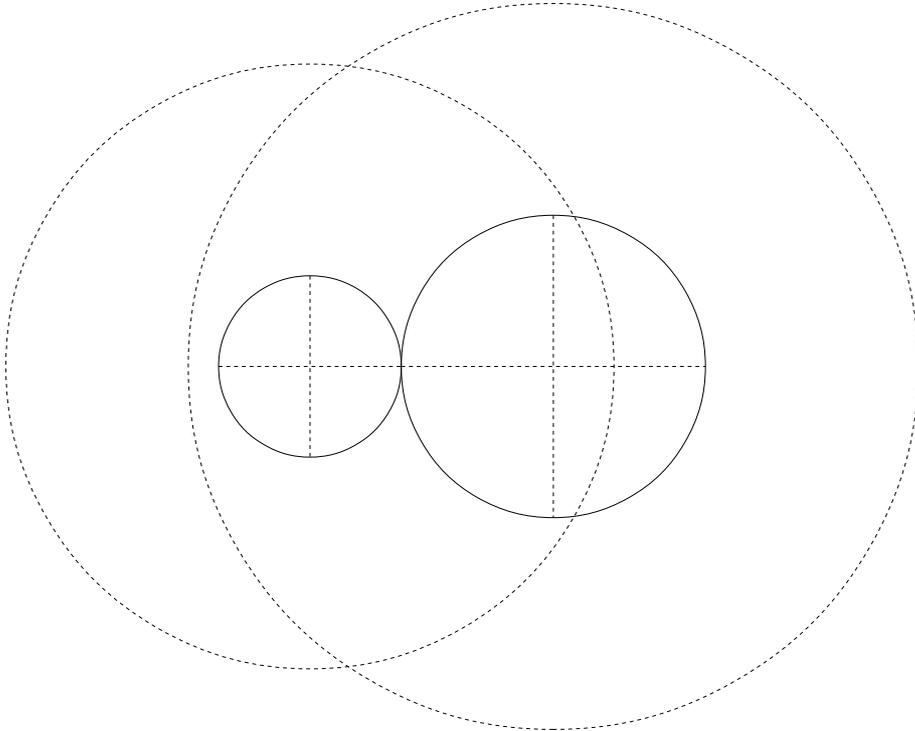

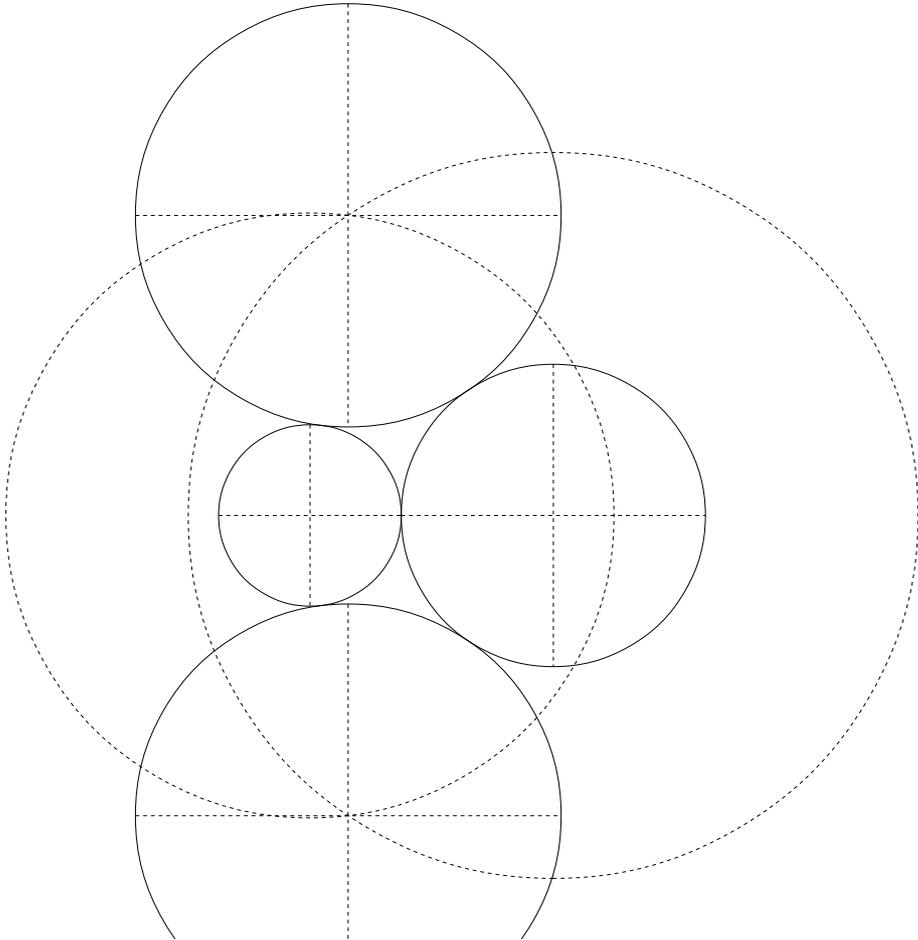

Calcolo grafico.

Il primo passo e' disegnarne 2. (Come mostrato altrove).

Disegno procedendo come per disegnare la  
circonferenza tangente mancante, per ognuna delle  
2 già presenti.

Disegno l'icona.
